

Project Folder & Documentation Structure Guide

Internship Project Submission Guide

This guide explains how to organize your project files and documentation before submitting your internship project. Please follow the folder structure exactly as shown.

STEP 1

Open Your Project Folder

Open your existing project folder — whatever your project is named. For example:

- Flood Prediction System
- Credit Card Approval Prediction
- Hospital Management System
- Blood Donation System

Inside this folder, you should already have your project source code, which usually includes:

- Source code
- Dataset
- Models
- Templates & Static files
- README and requirements.txt
- Assets and other project files

```
Project Name/  
├─ app.py  
├─ train.py  
├─ requirements.txt  
├─ README.md  
├─ data/  
├─ models/  
├─ templates/  
├─ static/  
└─ ...
```

STEP 2

Create a Documentation Folder

Inside the same project folder, create a new folder named **Project Documentation**.

```
Project Name/  
├─ Source Code  
├─ data/  
├─ models/
```

```
├── templates/
├── static/
└── Project Documentation/
```

STEP 3

Create Documentation Subfolders

Inside **Project Documentation**, create the following 8 folders exactly as shown:

```
Project Documentation/
├── 1. Brainstorming & Ideation
├── 2. Requirement Analysis
├── 3. Project Design Phase
├── 4. Project Planning Phase
├── 5. Project Development Phase
├── 6. Project Testing
├── 7. Project Documentation
└── 8. Project Demonstration
```

STEP 4

Create the Required Word Documents

Inside each folder, create the following Microsoft Word (.docx) files:

1. Brainstorming & Ideation

- Brainstorming & Idea Prioritization.docx
- Define Problem Statement.docx
- Empathy Map.docx

2. Requirement Analysis

- Customer Journey Map.docx
- Data Flow Diagram.docx
- Solution Requirements.docx
- Technology Stack.docx

3. Project Design Phase

- Problem Solution Fit.docx
- Proposed Solution.docx
- Solution Architecture.docx

4. Project Planning Phase

- Project Planning.docx

5. Project Development Phase

- Code Layout, Readability & Reusability.docx
- Coding & Solution.docx
- Functional Features.docx

6. Project Testing

- Performance Testing.docx

7. Project Documentation

- Project Documentation.docx
- Project Executable Files.docx

8. Project Demonstration

- Communication.docx
- Demonstration of Proposed Features.docx
- Scalability & Future Plan.docx
- Team Involvement in Demonstration.docx

STEP 5

Complete the Documentation

After creating all the Word documents:

- Follow the documentation template provided.
- Keep the same formatting, fonts, logos, and header table in every document.
- Write content according to your own project.
- Add diagrams, screenshots, and graphs wherever needed.

TIP

Convert every Word document (.docx) into its own PDF, and keep **both** the .docx and .pdf files inside the same folder.

Additional Scenario: Project Already on GitHub

If your project is already uploaded to GitHub and you do not have the project folder on your computer, follow these steps:

1. Open your GitHub repository.
2. Click the green **Code** button.
3. Click **Download ZIP**.
4. Wait for the ZIP file to download.
5. Extract (unzip) the downloaded ZIP file.
6. Open the extracted project folder.
7. Inside this folder, create a new folder named **Project Documentation**.
8. Follow the same documentation structure explained in this guide.
9. After completing the documentation, upload or commit the Project Documentation folder back to GitHub if required.

NOTE

If your project already exists on your computer, you do **not** need to download it again from GitHub. Simply open your existing project folder and continue from Step 2.

Final Folder Structure

```
Project Name/  
|  
├─ Source Code  
├─ Dataset  
├─ Models  
├─ Templates  
├─ Static  
├─ README.md  
|  
└─ Project Documentation/  
    ├─ 1. Brainstorming & Ideation  
    ├─ 2. Requirement Analysis  
    ├─ 3. Project Design Phase  
    ├─ 4. Project Planning Phase  
    ├─ 5. Project Development Phase  
    ├─ 6. Project Testing  
    ├─ 7. Project Documentation  
    └─ 8. Project Demonstration
```

Final Checklist

- ☐ Opened the correct project folder
- ☐ Created the Project Documentation folder
- ☐ Created all 8 documentation folders
- ☐ Created all required .docx files
- ☐ Added documentation content
- ☐ Added screenshots and diagrams

- ☐ Converted every .docx file into PDF
- ☐ Kept both .docx and .pdf versions
- ☐ Verified the final folder structure

Before submitting your internship project, make sure your project folder contains both your source code and the Project Documentation folder — organized exactly as shown in this guide.
